

Enhanced Long-lasting Prediction Orbit (ELPO)

Introduction

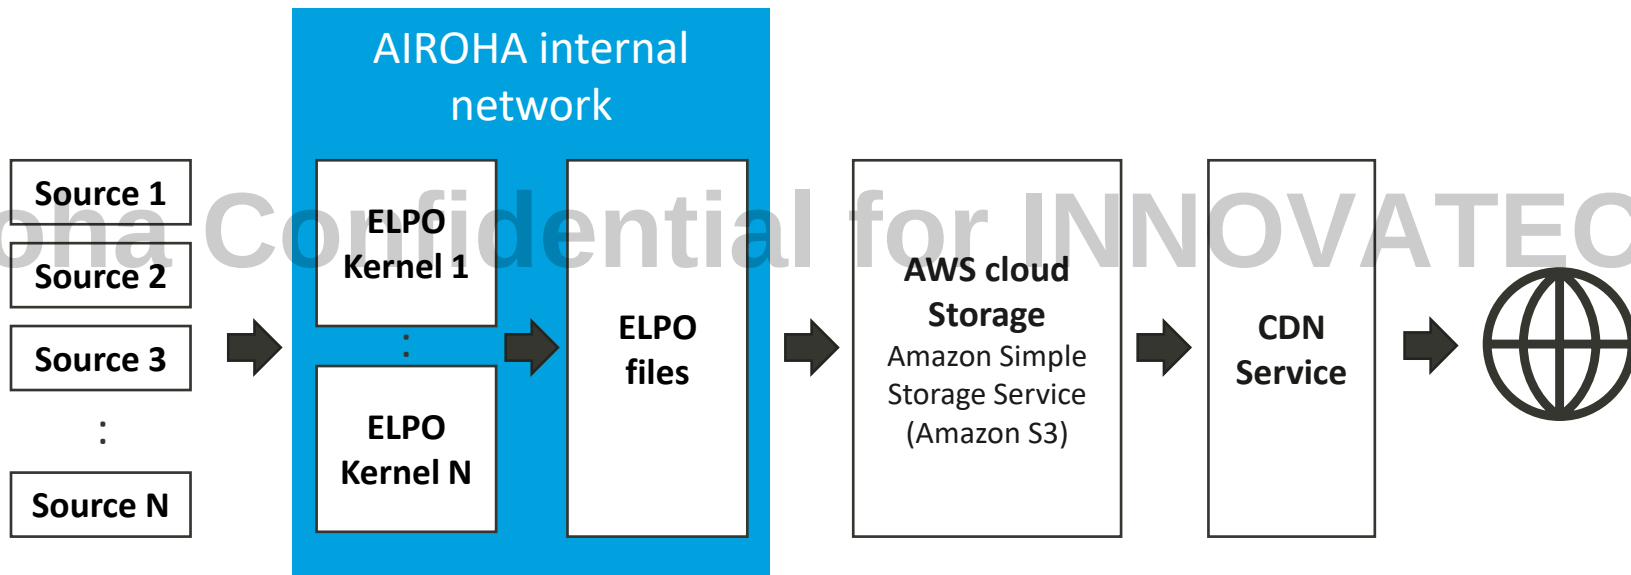

Enhanced Long-lasting Prediction Orbit (ELPO)

Introduction

- ❑ It includes predicted orbit and clock with high precision
 - Up to 7-day prediction
 - All constellations (GPS, GLONASS, Galileo, Beidou)

- ❑ It is developed and operated by AIROHA independently
 - Robustness: multiple data sources and duplicated backup systems
 - Integrity: monitor the prediction content and file availability
 - Compatibility: format is compatible to MTK EPO file

ELPO architecture

ELPO monitor system

Host

- Monitor data source, model status and ELPO data content

User experience

- Monitor service download response status
- Verify file availability from global sites
- Check accuracy and performance (TTFF, etc.)

Automatically notify

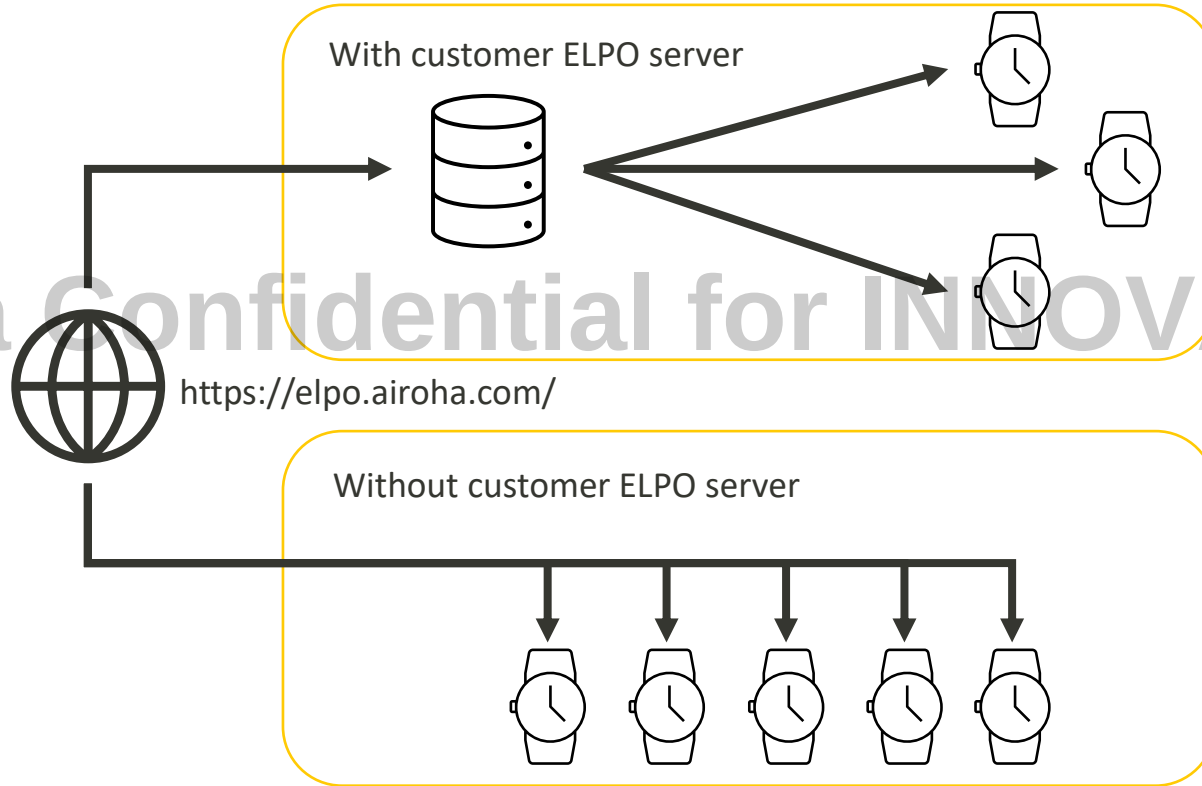

AIROHA RD

ELPO URL and file list

- [https://elpo.airoha.com/\[FILENAME\]?vendor=\[vendor\]&project=\[project\]&device_id=\[device\]](https://elpo.airoha.com/[FILENAME]?vendor=[vendor]&project=[project]&device_id=[device])
- Please contact support window to apply [vendor] / [project]
- The aiding methods of ELPO and EPO are the same

Constellation	Valid Period	ELPO filename	Legacy EPO filename
GPS + GLONASS	Day 1-3	ELPO_GR3_1.DAT	EPO_GR_3_1.DAT
GPS + GLONASS	Day 4-6	ELPO_GR3_2.DAT	EPO_GR_3_2.DAT
GPS + GLONASS	Day 7-9	ELPO_GR3_3.DAT	EPO_GR_3_3.DAT
GPS	Day 1-3	ELPO_GPS_3.DAT	EPO_GPS_3_1.DAT
Galileo	Day 1-3	ELPO_GAL_3.DAT	EPO_GAL_3.DAT
Beidou	Day 1-3	ELPO_BDS_3.DAT	EPO_BDS_3.DAT
GPS	Day 1-7	ELPO_GPS_07days.DAT	
Galileo	Day 1-7	ELPO_GAL_07days.DAT	
GLONASS	Day 1-7	ELPO_GLO_07days.DAT	
GLONASS	Day 1-3	ELPO_GLO_3.DAT	
Beidou	Day 1-7	ELPO_BD_07days.DAT	

ELPO implementation – New customer

ELPO implementation – migration guide

- **With customer ELPO server**
 - Add ELPO data link from AWS
- **Without customer ELPO server**
 - Replace EPO link with ELPO link
